SUMMARY

Software Engineer with a diploma in Computer Engineering, focused on Flutter app development and cybersecurity. Experienced in Django, Firebase, and vulnerability assessment, with a hands-on approach to secure and efficient software solutions.

EDUCATION

DIPLOMA IN COMPUTER ENGINEERING

GPTC Chelakkara College of Engineering
Thrissur, India

Expected Graduation: 2025
Currently in 3rd year, focusing on software development, programming languages, and cybersecurity bas

SKILLS

- Programming Languages: Dart (Flutter), Python, Bash, C, Java, PHP, JavaScript
- Web & App Development: Flutter, GetX, Firebase, Supabase, Django
- Frontend: HTML, CSS, JavaScript, UI/UX Design, Bootstrap
- Backend: Firebase, Supabase, Django, REST APIs
- Problem-Solving: Debugging, Logical Reasoning
- Database Management: Firebase, Supabase, Isar, SQLite
- Tools: Git, VS Code, Nmap, Kali Linux

EXPERIENCE

DJANGO DEVELOPER INTERN

Star Innovations — Thrissur, India
April 2024 (One-month internship)
- Developed a restaurant management system while learning Django.
- Gained experience with backend development, including models, views, templates, and database integration.
- Focused on building REST APIs and working with SQLite.

MACHINE LEARNING INTERN

Jyothi Engineering College — Thrissur, India
May 2023 (2 Weeks)
- Learned Python and basic machine learning concepts, including data manipulation and visualization with NumPy, Pandas, and Matplotlib.

PROJECTS

Wall App
Technologies: Flutter, Firebase
- Developed an app enabling users to log in, post, and view messages in real-time.

Restaurant Management System
Technologies: Django, SQLite
- Built a system for managing orders, and customer data.

Website Vulnerability Scanner
Technologies: Django, Python, Nmap
- Created a tool for scanning websites and identifying security risks with automated assessments.
